## PROJECT

### Research Management System

4/2025 - NOW

Team size: 1

- **Description:** A research management platform for universities/faculties. It supports project registration and approval, progress tracking, council evaluation, minutes/decisions, report and evidence uploads, and role-based notifications. Admins and research managers can monitor activities and generate summaries.
- **Technology:**
  - **Architecture:** Monolith (PHP + HTML/JS), modules by role (admin, research, teacher, student) with lightweight PHP APIs
  - **Language:** PHP, Javascript
  - **Frameworks/Libraries:** Bootstrap 4/5, jQuery, DataTables, Font Awesome, SB Admin 2 (selected pages)
  - **Database:** MySQL
  - **Tool:** XAMPP/Apache (Windows), Git, Postman, phpMyAdmin
- **Responsibility:**
  - Designed MySQL schema for projects, councils, scoring criteria, decisions, notifications, and progress.
  - Built project registration/approval workflow with status transitions and audit logs.
  - Implemented council management, role assignment, and criteria-based scoring.
  - Integrated secure file upload for reports/evidence with validation.
  - Developed notification features (counters, detail views, role-based APIs).
  - Optimized UI with Bootstrap + DataTables and enforced role-based access via sessions.
  - Wrote maintenance scripts for data checks/fixes and schema migrations.
  - Delivered admin and research dashboards with filters and summary reports.
- **Github Repository:** [HT\\_QLNCKH](#)
